# General Guidelines for Presentation

- Slides should not be too heavy with content. Better to create point wise.

- If you require more than one slide for any point, right click on that point slide then select duplicate slide and modify the duplicated slide.

- Diagrams must be aligned at centre and clearly visible with caption.

- All the mentioned fonts, font size, title content, etc should not change and strictly as per the given format and guidelines.

# Freelation – Free Lancing Website

**Project Guide**
Ms. Rujata Chaudhari

# Contents

- Introduction

- Objectives

- Scope

- Features / Functionality

- Project Outcomes

- Technology Stack

- Block Diagram if applicable

# 1. Introduction

- Freelancing websites are the sites where skill based persons (Employee,Programmers,etc) can earn applying their skills on particular domain & enhance there skills too.

- Problem Identified :

    - Not getting paid for particular product(Scams).

    - There was no interface between the companies, clients and the freelancers where companies can flexibly outsource their particular part of projects.

    - Not getting clients.

# 1. Introduction

- Solution Proposed :

  - Making contracts & agreements instead giving assurity of project completion and get payed.

  - We provided a platform called as freelation where both of these can meet their own requirements, where an employer can look for a specific need according to the skills provided by a freelancer.

  - Going to provide rating methos where people can rate the project & the person who maintain his good profile will ranks in top and can get clients easily.

# 2. Objectives

1. To provide more opportunities for emerging programmers.

2. To provide more employment options.

3. To have a more flexible schedule.

4. To get rid of boring 9-5 job.

5. To get away from all the restrictions and be independent of your work.

# 3. Scope

Write Scope of selected project topic in numbers like

1. Can be applied in all the domains.

2. Can be useful to each and everyone.

3. Can be

*(e.g. Can be applied in_____ place/domain/area etc*

*Can be useful to students/ Teachers/Parents etc.*)

# 4. Feature /Functionality

Write all the features & Functionality you are planning to implement

1.  Feature 1 : Registration/login

    - To explore & get clients in freelation first they have to login or register in freelation website.

2.  Feature 2 : Advanced search

    - Description in 2-3 lines

3.  Feature 3 : Secure Payment Gateway

- Description in 2-3 lines

1.  Feature 4 : Messaging/Chatting

    - Description in 2-3 lines

# 4. Feature /Functionality

Write all the features & Functionality you are planning to implement

5.  Feature 5 : Video Conferencing

    •   Description in 2-3 lines

6.  Feature 6 : Fully responsive

    •   Description in 2-3 lines

7.  Feature 7 : Project Bidding

    •   Description in 2-3 lines

    8. SEO (Search Engine Optimization)

# 5. Outcome of Project

1. User can log in and create/edit his/her profile.

2. User can search for options available.

3. User can communicate with others through chat/video conferencing.

4. User can make payment through secure payment gateway.

5. User can rate and leave reviews for different creators.

6. User can post videos relating their skills and area of expertise.

# 6. Technology Stack

Write what you have planned to develop front end ( GUI ) & Backend (Database if applicable)

1.   For front end (GUI) -- Java Fx Framework, Java Serverlet,

     Java Spring, Javascript, HTML, CSS.

2.   Intermidiate -- Note js, JDBC.

3.    For backend (Database) -- Java Connectivity, MySQL Database.

# 7. Block Diagram ( if applicable)
